PHP, Coldfusion,
Python, Java,
Javascript, C#

Larry Stanfield

Full Stack and Web Applications Developer

Software Engineer

Personal Summary

I'm a web developer that resides in Philadelphia PA. I specialize in both front-end and back-end technologies, this is also referred to as "full-stack" development. I've worked with several different companies in Philadelphia and New Jersey areas to develop websites and web applications. I'm adept at solving problems and learning new skills on the fly.

I am the type of developer who can hit the ground running and integrate with a team with little to no prep time. I work within time constraints and deliver quality work.

I've created large websites, web applications, modules, and plugins. I've created database schemas from scratch using DB tools such as MySQL Workbench and Microsoft SQL Server.

I'm also open to learning new tech and I consider myself a hobbyist at heart.

Software Engineer 1
WebstaurantStore
Jun 2020 - Present
