Blog: [blog.larrystanfield.com](http://blog.larrystanfield.com)

LinkedIn: <https://www.linkedin.com/in/larrystanfieldwebdev/>

### Mission Statement:

My goal is to develop applications and software that are efficient and scale well.

### Personal Statement:

I'm a software engineer and full-stack web applications developer living in Philadelphia, PA. I'm adept at solving problems and learning new skills on the fly. I am the type of developer who can hit the ground running and integrate with a team with little to no prep time. I work within time constraints and deliver quality work.

### Experience:

Information Technology Consultant

Synergycom

July 2024 - Present

- Maintained and built new features with Coldfusion legacy codebase
- Built an API that accepts and processes hardware requests for clients.

Software Engineer 2

WebstaurantStore

Jun 2020 - Present

- Maintaining a middleware application that delivers emails and notifications to internal clients
- Developed an internal application that acts as a deprecating and tracking system, replacing internal tools
- Created various patches and features for the shopping and dashboard application when they were primarily written in CFML, saving the company millions of dollars.

Coldfusion Developer

travallianceMedia

October 2015 - August 2019

- Developed new features within the company's private CMS and the Agent Studio platform.
- Rebuilt the backend for Agent Studio from the ground up, refactoring it with modern code standards and a stronger focus on OOP/Modular Code Structure.
- Created and managed a small service that monitors and blocks IPs from the Agent Studio platform.

Owner | Developer

Red Robot Programming

September 2011 - Present

- One-man webshop performs front-end and back-end development services. Expanding into mobile development.
- Specializes in CMS Development with WordPress, Expression Engine, and Silverstripe
- Specializes in dynamic development and custom web applications.

### Education:

Community College of Philadelphia

- Associate of Science (A.S.), Computer Science

Arizona State University

- Bachelor of Science - (B.S.), Information Technology
- Master of Science - (M.S.), Information Technology
